Subject Index

AAAV multiplication, FAV 1 DNA transfection, Placque assay, Indirect immunofluorescence assay, 335
AIDS, Concanavalin A, Flow cytometry, Membrane mobility, Receptor capping, 257
African horsesickness virus, F(ab′)2, ELISA, Diagnosis, 279
Agarose gel electrophoresis, HBV DNA, Oligonucleotide primers, Polymerase chain reaction, DNA amplification, 225
Analytic chromatography, Viral DNA-binding protein, 97
Anti-IgG peroxidase, Measles virus, Immunoperoxidase, Immunoblotting, IgG-peroxidase, 91
Antigen-capture ELISA, Viral hemorrhagic septicaemia virus, Monoclonal antibody, Rainbow trout, 325
Arenavirus, Junin virus, Argentine hemorrhagic fever, Neutralization, Complement, 71
Argentine hemorrhagic fever, Junin virus, Neutralization, Complement, Arenavirus, 71

B19 diagnosis, Human parvovirus B19, Recombinant viral antigen, Indirect immunofluorescence assay, 53
Beet necrotic yellow vein virus, Virus infection, Protoplast, Sugar beet, Ultrasound, 63
Bovine coronavirus, Polymerase chain reaction, Probe labeling, Detection, 243

CD4+ HeLa cell, HIV, Focal immunoassay, Dideoxynucleoside, Sulfated polysaccharide, HEPT, TIBO, 197
Cervical scrape, Cross-over study, Plastic versus wood spatulas, Dot-blot hybridization, 267
51Chromium release assay, ERA rabies virus, Cytotoxic T cell, H-2 haplotype, Persistently infected target cell, 1
Chicken, Purification of serum IgM, 117
Complement, Junin virus, Argentine hemorrhagic fever, Neutralization, Arenavirus, 71
Concanavalin A, AIDS, Flow cytometry, Membrane mobility, Receptor capping, 257
Cross-over study, Plastic versus wood spatulas, Dot-blot hybridization, Cervical scrape, 267
Cross-reactivity, Enterovirus, Echovirus, Immunoblotting, IgM, IgA, 143
Cytotoxic T cell, ERA rabies virus, 51Chromium release assay, H-2 haplotype, Persistently infected target cell, 1

DNA amplification, HBV DNA, Oligonucleotide primers, Polymerase chain reaction, Agarose gel electrophoresis, 225
Detection, Bovine coronavirus, Polymerase chain reaction, Probe labeling, 243
Diagnosis of enterovirus infection, Infective and defective virion, Reactivity with enterovirus-specific IgM, Reactivity with monoclonal antibody, 209
Diagnosis, F(ab′)2, ELISA, African horsesickness virus, 279
Dideoxynucleoside, HIV, Focal immunoassay, CD4+ HeLa cell, Sulfated polysaccharide, HEPT, TIBO, 197
cDNA clone, Epstein-Barr virus, 127
Dot-blot hybridization, Cross-over study, Plastic versus wood spatulas, Cervical scrape, 267

EIA, Rotavirus, Immunodot assay, Immunogold staining, 157
ELISA screening test, env, Foamy virus, Recombinant antigen, 13
ELISA, F(ab′)2, African horsesickness virus, Diagnosis, 279
ELISA, HHV6 antibodies, IFA, 313
ELISA, HIV, Western blot, 81
ERA rabies virus, Cytotoxic T cell, 51Chromium release assay, H-2 haplotype, Persistently infected target cell, 1
Echovirus, Enterovirus, Immunoblotting, IgM, IgA, Cross-reactivity, 143
Enterovirus, Echovirus, Immunoblotting, IgM, IgA, Cross-reactivity, 143
Envelope protein gp120, Epitope mapping, HIV-1, 105
Epitope mapping, HIV-1, Envelope protein gp120, 105
Epstein-Barr virus, cDNA clone, 127

F(ab′)2, ELISA, African horsesickness virus, Diagnosis, 279
FAV 1 DNA transfection, AAAV multiplication, Placque assay, Indirect immunofluores-

cence assay, 335
Flow cytometry, AIDS, Concanavalin A, Membrane mobility, Receptor capping, 257
Foamy virus, ELISA screening test, env, Recombinant antigen, 13
Focal immunoassay, HIV, CD4+ HeLa cell, Dideoxynucleoside, Sulfated polysaccharide, HEPT, TIBO, 197
Foot-and-mouth disease virus, Freeze-drying, Infectivity, 43
Foot-and-mouth disease, Langerhans cell, Vaccine, 189
Freeze-drying, Foot-and-mouth disease virus, Infectivity, 43

Genetic hetero-geneity, HIV, tat, Transfection, Homologous recombination, Hybrid HIV, 291

H-2 haplotype, ERA rabies virus, Cytotoxic T cell, 51Chromium release assay, Persistently infected target cell, 1
HBV DNA, Oligonucleotide primers, Polymerase chain reaction, Agarose gel electrophoresis, DNA amplification, 225
HEPT, HIV, Focal immunoassay, CD4+ HeLa cell, Dideoxynucleoside, Sulfated polysaccharide, TIBO, 197
HHV6 antibodies, IFA, ELISA, 313
HIV, ELISA, Western blot, 81
HIV, Focal immunoassay, CD4+ HeLa cell, Dideoxynucleoside, Sulfated polysaccharide, HEPT, TIBO, 197
HIV, Immunomagnetic beads, MOLT4/HTLV-IIIB cell, U937/HTLV-IIB cell, 23
HIV, Radioimmunoprecipitation assay, 341
HIV, tat, Transfection, Homologous recombination, Hybrid HIV, Genetic hetero-geneity, 291
HIV-1, Epitope mapping, Envelope protein gp120, 105
Hepatitis, Solid-phase immune electron microscopy, Virus identification, Immune electron microscopy, 177
Herpes simplex virus, Uracil-DNA glycosylase, PBS2 inhibitor, 233
Homologous recombination, HIV, tat, Transfection, Hybrid HIV, Genetic hetero-geneity, 291
Human parvovirus B19, Recombinant viral antigen, Indirect immunofluorescence assay, B19 diagnosis, 53
Hybrid HIV, HIV, tat, Transfection, Homologous recombination, Genetic hetero-geneity, 291

IFA, HHV6 antibodies, ELISA, 313
IgA, Enterovirus, Echovirus, Immunoblotting, IgM, Cross-reactivity, 143
IgG-peroxidase, Measles virus, Immunoperoxidase, Immunoblotting, Anti-IgG peroxidase, 91
IgM, Enterovirus, Echovirus, Immunoblotting, IgA, Cross-reactivity, 143
Immune electron microscopy, Solid-phase immune electron microscopy, Hepatitis, Virus identification, 177
Immunoblotting, Measles virus, Immunoperoxidase, IgG-peroxidase, Anti-IgG peroxidase, 91
Immunoblotting, Enterovirus, Echovirus, IgM, IgA, Cross-reactivity, 143
Immunodot assay, Rotavirus, Immunogold staining, EIA, 157
Immunogold staining, Rotavirus, Immunodot assay, EIA, 157
Immunomagnetic beads, HIV, MOLT4/HTLV-IIIB cell, U937/HTLV-IIB cell, 23
Immunoperoxidase, Measles virus, Immunoblotting, IgG-peroxidase, Anti-IgG peroxidase, 91
Inactivated foot-and-mouth disease virus, Liquid-phase blocking ELISA, 33
Indirect immunofluorescence assay, Human parvovirus B19, Recombinant viral antigen, B19 diagnosis, 53
Indirect immunofluorescence assay, FAV 1 DNA transfection, AAAV multiplication, Placque assay, 335
Infective and defective virion, Diagnosis of enterovirus infection, Reactivity with enterovirus-specific IgM, Reactivity with monoclonal antibody, 209
Infectivity, Freeze-drying, Foot-and-mouth disease virus, 43

Junin virus, Argentine hemorrhagic fever, Neutralization, Complement, Arenavirus, 71

Langerhans cell, Vaccine, Foot-and-mouth disease, 189
Liquid-phase blocking ELISA, Inactivated foot-and-mouth disease virus, 33

MOLT4/HTLV-IIIB cell, HIV, Immunomagnetic beads, U937/HTLV-IIB cell, 23
Measles virus, Immunoperoxidase, Immuno-

blotting, IgG-peroxidase, Anti-IgG peroxidase, 91
Membrane mobility, AIDS, Concanavalin A, Flow cytometry, Receptor capping, 257
Monoclonal antibody, Antigen-capture ELISA, Viral haemorrhagic septicaemia virus, Rainbow trout, 325

Neutralization, Junin virus, Argentine hemorrhagic fever, Complement, Arenavirus, 71
Nucleotide sequencing, RNA virus, Primer extension, 167

Oligonucleotide primers, HBV DNA, Polymerase chain reaction, Agarose gel electrophoresis, DNA amplification, 225

PBS2 inhibitor, Uracil-DNA glycosylase, Herpes simplex virus, 233
Persistently infected target cell, ERA rabies virus, Cytotoxic T cell, 51Chromium release assay, H-2 haplotype, 1
Placque assay, FAV 1 DNA transfection, AAAV multiplication, Indirect immunofluorescence assay, 335
Plastic versus wood spatulas, Cross-over study, Dot-blot hybridization, Cervical scrape, 267
Poliovirus, Ultracentrifugation, 303
Polymerase chain reaction, HBV DNA, Oligonucleotide primers, Agarose gel electrophoresis, DNA amplification, 225
Polymerase chain reaction, Bovine coronavirus, Probe labeling, Detection, 243
Primer extension, RNA virus, Nucleotide sequencing, 167
Probe labeling, Bovine coronavirus, Polymerase chain reaction, Detection, 243
Protoplast, Beet necrotic yellow vein virus, Virus infection, Sugar beet, Ultrasound, 63
Purification of serum IgM, Chicken, 117

RNA virus, Nucleotide sequencing, Primer extension, 167
Radioimmunoprecipitation assay, HIV, 341
Rainbow trout, Antigen-capture ELISA, Viral hemorrhagic septicaemia virus, Monoclonal antibody, 325
Reactivity with enterovirus-specific IgM, Diagnosis of enterovirus infection, Infective and defective virion, Reactivity with monoclonal antibody, 209
Reactivity with monoclonal antibody, Diagnosis of enterovirus infection, Infective and defective virion, Reactivity with enterovirus-specific IgM, 209
Receptor capping, AIDS, Concanavalin A, Flow cytometry, Membrane mobility, 257
Recombinant antigen, Foamy virus, ELISA screening test, env, 13
Recombinant viral antigen, Human parvovirus B19, Indirect immunofluorescence assay, B19 diagnosis, 53
Rotavirus, Immunodot assay, Immunogold staining, EIA, 157

Solid-phase immune electron microscopy, Hepatitis, Virus identification, Immune electron microscopy, 177
Sugar beet, Beet necrotic yellow vein virus, Virus infection, Protoplast, Ultrasound, 63
Sulfated polysaccharide, HIV, Focal immunoassay, CD4+ HeLa cell, Dideoxynucleoside, HEPT, TIBO, 197

tat, HIV, Transfection, Homologous recombination, Hybrid HIV, Genetic hetero-geneity, 291
TIBO, HIV, Focal immunoassay, CD4+ HeLa cell, Dideoxynucleoside, Sulfated polysaccharide, HEPT, 197
Transfection, HIV, tat, Homologous recombination, Hybrid HIV, Genetic hetero-geneity, 291

U937/HTLV-IIB cell, HIV, Immunomagnetic beads, MOLT4/HTLV-IIIB cell, 23
Ultracentrifugation, Poliovirus, 303
Ultrasound, Beet necrotic yellow vein virus, Virus infection, Protoplast, Sugar beet, 63
Uracil-DNA glycosylase, Herpes simplex virus, PBS2 inhibitor, 233

Vaccine, Langerhans cell, Foot-and-mouth disease, 189
Viral DNA-binding protein, Analytic chromatography, 97
Viral hemorrhagic septicaemia virus, Antigen-capture ELISA, Monoclonal anti-body, Rainbow trout, 325
Virus identification, Solid-phase immune electron microscopy, Hepatitis, Immune electron microscopy, 177
Virus infection, Beet necrotic yellow vein virus, Protoplast, Sugar beet, Ultrasound, 63

Western blot, HIV, ELISA, 81
